JavaScript

React

Git

RESTful APIs

CSS3

HTML5

- Implemented user-friendly interfaces using React to enable seamless QR code generation.
- Ensured responsive design for optimal performance across desktop and mobile devices.
- Integrated functionalities allowing users to generate and download/share QR codes instantly.
- Utilized RESTful APIs to manage QR code generation processes efficiently and ensure instant results.
- Deployed the application on Vercel for easy online access and tested extensively to optimize user experience and functionality.
- Maintained privacy standards by ensuring the app does not store any user data.

Responsive Web Design

- Collaborated with cross-functional teams to translate project requirements into a scalable e-commerce web application.
- Developed RESTful APIs using Node.js and Express.js to manage product data, user authentication, and order functions.
- Implemented React.js frontend to provide a responsive and user-friendly interface for browsing products and managing accounts.
- Optimized MongoDB database queries to ensure efficient retrieval and storage of product information, user data, and cart details.
- Ensured seamless integration between frontend and backend components and conducted thorough testing to maintain application reliability.
